(NPDES NO. CA0004758)**

**FOR**

**SACRAMENTO MUNICIPAL UTILITY DISTRICT  
RANCHO SECO NUCLEAR GENERATING STATION, UNIT 1  
AND RANCHO SECO PARK  
SACRAMENTO COUNTY**

The Sacramento Municipal Utility District (Discharger) owns and operates the Rancho Seco Nuclear Generating Station, Unit 1, which is a decommissioning nuclear facility nearing completion of the dismantlement phase. Wastewater consisting of stormwater, fire pump testing water, irrigation runoff, treated liquid radioactive wastewater, and treated municipal wastewater is combined and diluted with water from the Folsom South Canal and discharged to an unnamed tributary of Clay Creek, a water of the United States and a tributary to the Cosumnes River. The Discharger also operates a 1-acre wastewater treatment pond located at Rancho Seco Park, adjacent to the Rancho Seco Nuclear Generating Station, Unit 1. The unlined, aerated pond treats an annual average flow of approximately 2,000 gallons per day of domestic wastewater from the park and doesn't discharge to a surface water. Both these facilities are regulated by Waste Discharge Requirements (NPDES No. CA0004758) Order No. R5-2007-0016.

The Discharger has permanently discontinued the discharge of treated domestic wastewater to surface water and operates an Artificial Wetlands Wastewater Treatment system under the State Water Resources Control Board General Order 97-10-DWQ (Notice of Applicability 97-DWQ-5019). The separate Rancho Seco Park domestic wastewater system is also operates under General Order 97-10-DWQ (Notice of Applicability 97-10-DWQ-5020). Both these notices were issued 16 June 2009.
